

## LARC Employee Chemical Safety Training Documentation

I have read and received training through my job duty SOPs on the hazards of the specific chemicals utilized listed on this form. The list of applicable SOPs is attached. If there are changes/additions in the chemicals or how they are utilized in the performance of my duties, I understand I will receive training. I am also aware that the locations of the (M)SDS chemical safety sheets are located in each LARC facility office or in addition (M)SDS information can be accessed online. I also understand that in the performance of some of my duties, if they involve handling and working with chemicals, I must follow procedures and PPE recommendations as outlined in the SOPs and Safety Signs posted in the LARC facilities. I understand that I must follow safety procedures as stated above when working either alone or with other staff members during regular work hours, weekends and holidays. (POLARC004-Work Hours and Leave Policy)

### Chemicals

Cage - Klenz 280 (Acid Cleaner/Scale Remover)	HACH CL-17 Reagent – DPD
Sporklenz RTU, Disinfectant	HACH CL- 17 Reagent – Buffer Solution
