Dr. Taylor Eighmy  
President  
The University of Texas at San Antonio  
One UTSA Circle  
San Antonio TX  78249

Dear Dr. Eighmy

On behalf of all the Airmen of 24th Air Force – AIR FORCES CYBER, we are thrilled to witness the University of Texas at San Antonio (UTSA) introduce the National Security Collaboration Center (NSCC) as a powerful new cyber foundry in our local community.

Through the collaboration of advanced research, education and force development, the combined resources of the Department of Defense, UTSA, and our local community will forge new opportunities to leverage innovation and defend against threats within the cyberspace domain. In addition, NSCC partnerships with agencies such as the U.S. Secret Service and U.S. Cyber Command to support joint capabilities, presents a distinct advantage in securing our national cyber infrastructure.

At AIR FORCES CYBER, our Airmen deliver full-spectrum, global cyberspace capabilities and effects for our service, the joint force and our nation. We live in an era of unprecedented transformation. To fully address the escalating cyberspace threat requires not only a “whole-of-government” approach, but a “whole-of-society” engagement. We commend the University on this effort and look forward to future collaboration.

Sincerely

Chris P. Weggeman  
Major General, USAF  
Commander
