

U.S. Army Research Laboratory South-Cyber Students

Tuesday—01.29.2019

UTSA Main Campus, John Peace Library

Faculty Center Assembly Room (JPL 4.04.22)

Bash Bug

8:00—10:00am

Within a virtual environment, participants will walk through the steps that an attacker would use to exploit the bash bug vulnerability, using popular assessment tools including Burpsuite. Afterwards, participants will remediate vulnerabilities and verify that the attack is no longer possible.

Registration Link:

Social Engineering Forensics

10:30am—12:30pm

Participants will take on the role of a Cyber Investigator in a mock investigation. Participants will use forensics analysis tools, including Autopsy, to analyze and uncover artifacts from a multi-stage attack on an individual's personal network.
