Defense Advanced Research Projects Agency (DARPA), Young Faculty Award	https://www.darpa.mil/work-with-us/for-universities/young-faculty- award	Deadline: November 12, 2019 (anticipated)	The Defense Advanced Research Projects Agency (DARPA) Young Faculty Award (YFA) program aims to identify and engage rising stars in junior faculty positions in academia and equivalent positions at non-profit research institutions and expose them to Department of Defense (DoD) and National Security challenges and needs. In particular, this YFA will provide high-impact funding to elite researchers early in their careers to develop innovative new research directions in the context of enabling transformative DoD capabilities. The long-term goal of the program is to develop the next generation of scientists and engineers in the research community who will focus a significant portion of their future careers on DOB and National Security issues. DARPA is particularly interested in identifying outstanding researchers who have previously not been performers on DARPA programs, but the program is open to all qualified applicants with innovative research ideas.
Esther A. and Joseph Klingenstein Fund, Fellowship Awards in the Neurosciences	http://www.klingfund.org/	Deadline: February 10, 11:59pm EST	The Esther A. & Joseph Klingenstein Fund and the Simons Foundation announce the opening of its 2019 competition for research fellowships in neuroscience. Previously known as the Klingenstein Fellowship Awards in Neuroscience, this year's awards are the sixth from this joint project of the Klingenstein Fund and the Simons Foundation. The awards are among the nation's oldest and most illustrious fellowships for young investigators in neuroscience research. Aimed at advancing cutting- edge investigations, the awards are presented to highly promising, early career scientists. At this critical juncture in young investigators' careers, when funding can be a challenge, the fellowship awards promote higher-risk, and potentially higher-reward, projects.
Kauffman Knowledge Challenge	https://rfp.kauffman.org/	White paper deadline: May 2022 (anticipated)	The Ewing Marion Kauffman Foundation works in education and entrepreneurship to carry out the vision of Ewing Kauffman, who believed that everyone should have the opportunity to take an uncommon approach in their drive to succeed. The Ewing Marion Kauffman Foundation's Quality Enhancement Grants program supports quality improvement efforts in early learning programs serving children birth to five in the Kansas City region. Programs in Johnson and Wyandotte counties in Kansas and Cass, Clay, Jackson and Platte counties in Missouri enrolling at least forty percent children from lower-income families are eligible for grants of up to \$100,000 per year over two years. Organizations working directly with early learning programs on quality improvement initiatives also qualify for this opportunity.
Foundation Fighting Blindness, Career Development Awards	http://www.blindness.org/apply-for-funding#cda	Deadline: June 24, 2021, at 7 p.m. ET	The Foundation's goal was clear and focused: To drive the research that would lead to preventions, treatments, and vision restoration for the spectrum of degenerative retinal diseases, specifically macular degeneration – including age related macular degeneration, retinitis pigmentosa, Usher syndrome, Stargardt disease and Leber congenital amaurosis (LCA). Together these conditions affect more than 10 million Americans and millions more throughout the world.
		, ut / pilline	
Foundation for Food and Agricultural Research (FFAR), New Innovator in Food and Agricultural Research*	https://foundationfar.org/new-innovator/_	Full Applications Due: May 5, 2021 at 5:00 pm ET	The New Innovator in Food and Agriculture Research Award is designed to provide the early investment needed to launch new faculty members into successful scientific careers in food and agriculture. Investing a substantial amount in faculty members within the first three years of their careers will allow them to pursue innovative and transformational ideas uninhibited by the pressure of identifying their next grant. The New Innovator Award seeks to promote career advancement of highly creative and promising new scientists who intend to make a long-term career commitment to research in food and agriculture and bring innovative, ground-breaking research initiatives and thinking to bear on problems facing food and agriculture.
Greenwall Foundation, Faculty Scholars Program in Bioethics	https://greenwall.org/faculty-scholars-program	Applications for 2021-2022 cycle will be announced in Summer 2021	The Greenwall Faculty Scholars Program in Bioethics is a career development award to enable junior faculty members to carry out innovative bioethics research. It supports research that goes beyond current work in bioethics to help resolve pressing ethical issues in clinical, biomedical, and public health decision-making, policy, and practice, and creates a community that enhances future bioethics research by Scholars and Alumni/ae.

## **Early Career Funding Opportunities**

SPONSOR/PROGRAM NAME	LINK TO FURTHER INFORMATION	DEADLINE(S)	DESCRIPTION
Human Frontier Science Program, Young Investigators' Research Grants	http://www.hfsp.org/funding/research-grants_	Initiation of LOI Deadline: March 18th 2021	HFSP Research Grants support <b>innovative basic research</b> into fundamental biological problems with emphasis placed on <b>novel and interdisciplinary</b> <b>approaches</b> that involve scientific exchanges across national and disciplinary boundaries. Projects are expected to be at the frontiers of knowledge and therefore entail risk. Participation of scientists from disciplines outside the traditional life sciences such as biophysics, chemistry, computational biology, computer science, engineering, mathematics, nanoscience or physics is recommended because their contributions have made biological research increasingly quantitative and because such collaborations have opened up new approaches for understanding the complex structures and regulatory networks that characterize living organisms, their evolution and interactions.
James S. McDonnell Foundation, Post Doctoral Fellowship	https://www.jsmf.org/programs/cs/	Deadline: June 11, 2021 15:59 CDT	The Understanding Dynamic & Mutli-scale Systems program (formerly the Studying Complex Systems) supports scholarship and research directed toward the development of theoretical and mathematical tools that can be applied to the study of complex, adaptive, nonlinear systems. It is anticipated that research funded in this program will address issues in fields such as biology, biodiversity, climate, demography, epidemiology, technological change, economic development, governance, or computation.
Jane Coffin Childs Memorial Fund for Medical Research	http://www.jccfund.org/fellowship-information/important-dates-and documents/	Deadline: February 1, 2021 5pm EST (anticipated)	The Jane Coffin Childs Memorial Fund for Medical Research (known colloquially as the JCC Fund) was established in 1937 for the purpose of supporting research into the causes and treatment of cancer. The Fund has taken a broad approach to the study of cell growth and development, emphasizing the study of the basic biology and chemistry of the underlying processes. The Fund has increasingly focused its resources on the funding of three-year postdoctoral Fellowships, supporting Fellows selected by its Board of Scientific Advisers from among the best young scientists at what is often a critical stage in their careers. As a result, there have been over 1,600 Jane Coffin Childs Fellows doing basic cancer-related research in laboratories in North America, Europe, Japan and Australia.
Josiah Macy Jr. Foundation, Macy Faculty Scholars	http://macyfoundation.org/macy-scholars_	Deadline: February 10, 2021, by 3:00 pm ET	The Macy Faculty Scholars Program is designed to identify and nurture the careers of promising educational innovators in medicine and nursing. We select up to five faculty leaders each year.
Juvenile Diabetes Research Foundation, Career Development Award	http://grantcenter.jdrf.org/fa/career-development-awards/	JDRF will not issue an RFA for new training awards in FY21. We regret these unfortunate circumstances and will resume our usual process in FY22.	JDRF fosters the development and productivity of the best and the brightest established independent researchers who will bridge the gap between the bench and bedside. The primary purpose of the Career Development Award is to attract qualified and promising scientists early in their faculty careers and to give them the opportunity to establish themselves in areas that reflect the IDRF research emphasis areas. In the five-year term of the award, awardes will focus their research efforts on a subject directly related to JDRF mission goals and research priorities, and position themselves to work at the leading edge of type 1 diabetes research. These awards are designed to assist exceptionally promising investigators. Although JDRF is especially interested in fostering careers in clinical investigation, Career Development Awards may emphasize either basic or clinical topics.
Leukemia Research Foundation, New Investigator Research			The Leukemia Research Foundation exclusively funds New Investigators - individuals beginning to establish their own laboratories that are no longer under the tutelage
Grants	https://allbloodcancers.org/researchgrants/guidelines/ https://lungevity.org/research/translational-science-	Deadline: April 5, 2021, 12:00pm CST LOIs due: by February 24, 2021	of a senior scientist mentor. Rita Allen Foundation, Scholar Program*	http://ritaailen.org/anoly/	LOI March 6, 2020	The Rita Allen Foundation currently makes grants for charitable purposes in two primary domains: Investing in young leaders in science and social innovation; Promoting civic literacy and engagement. Within these domains, the Foundation identifies organizations for funding based on its goals and strategies. While the vast majority of our grant making is conducted through the Rita Allen Foundation Scholars program and through the Foundation's research and consultation with sector experts, we also provide an opportunity for nonprofit organizations to submit unsolicited Letters of Inquiry if they believe they are an excellent fit for our portfolio. This process allows us to open lines of communication with a diverse pool of organizations.

Simons Foundation Autism Research Initiative (SFARI), Bridge	grants_ https://www.sfari.org/grant/bridge-to-independence-award- request-for-applications/	Letters of recommendation and LOIs due: April	SFARI is invested in supporting the next generation of top autism researchers. The Bridge to Independence Award program promotes talented early-career scientists by facilitating their transition to research independence and providing grant funding at the start of their professorships at a U.S. or Canadian research institution. The purpose of the David H. Smith Conservation Research Fellowship is: To create opportunities for leading conservation scientists to strengthen their skills through two years of applied post-doctoral research, supplemented by training programs, peer networking, and field learning experiences; so that they may: 1. Build productive partnerships with conservation practitioners; and 2. Contribute and communicate scientific knowledge to problems of critical importance in conservation.

Please check back in October 2021 Deadline: March 17, 2021 11:59pm EDT Letter of Intent Deadline: July 2022 (anticipated) The Foundation is no longer accepting nominations for the 2021 Lasker Awards. Winners of the 2021 Awards will be announced in September.	SFARI is invested in supporting the next generation of top autism researchers. The Bridge to Independence Award program promotes talented early-career scientists by facilitating their transition to research independence and providing grant funding at the start of their professorships at a U.S. or Canadian research institution. The purpose of the David H. Smith Conservation Research Fellowship is: To create opportunities for leading conservation scientists to strengthen their skills through two years of applied post-doctoral research, supplemented by training programs, peer networking, and field learning experiences; so that they may: 1. Build productive partnerships with conservation practitioners; and 2. Contribute and communicate scientific knowledge to problems of critical importance in conservation. The Young Investigator Award, supported by Sunovion, recognizes the outstanding achievements and contributions by a young neuroscientist who has demonstrated scholarly independence. The piot research grant is designed to help a basic or clinical scientist in the early stages of their career conduct research that may lead to further funding. This grant may be used for salary support of the principal investigator, as well as direct costs of supplies and equipment. Support is not provided for salaries of other research personnel, or for indirect costs. The Distinguished Scientist Award (DSA) seeks to provide career and research support to early career scientists who demonstrate outstanding promise for making scientific and medical breakthroughs in the field of brain cancer research. The Research Program is an essential driving force for achieving the mission of ending breast cancer forever. As the global leader in the fight against breast cancer, we strive to identify and support the best science around the world. However, the scientific focus areas of our grant mechanisms can vary from year to year and are determined in part through discussion with our Scientific Advisory Board. The Foundation will begin accepting

## **Early Career Funding Opportunities**

SPONSOR/PROGRAM NAME	LINK TO FURTHER INFORMATION	DEADLINE(S)	DESCRIPTION
Whitehall Foundation, Grants-in-Aid			The Whitehall Foundation, through its program of grants and grants-in-aid, assists scholarly research in the life sciences. It is the Foundation's policy to assist those dynamic areas of basic biological research that are not heavily supported by Federal Agencies or other foundations with specialized missions. In order to respond to the changing environment, the Whitehall Foundation periodically reassesses the need for financial support by the various fields of biological research. The research grants programs support high-quality field-initiated studies that are relevant to policies and practices that affect the lives of young people ages 5 to 25 in 0.
William T. Grant Scholars Program, William T. Grant Foundation	http://wtgrantfoundation.org/grants#apply-wtgrant- scholars_	Deadline: August 4, 2021, 3:00pm EST.	the United States. Research proposals are evaluated on the basis of their fit with a given focus area; the strength and feasibility of their designs, methods, and analyses; their potential to inform change; and their contribution to theory and empirical evidence.
